SUMMARY

Software Engineer with 3 years of experience building cross-platform mobile apps in Flutter and Dart, with REST API backends in FastAPI (Python) on PostgreSQL and Supabase. Experienced in database design and end-to-end delivery for remote freelance clients, from UI to backend.

SKILLS

Languages: Dart, TypeScript, Rust, Python, Java, C

Mobile: Flutter, React Native, Android

Desktop: Tauri

Frontend: React, Next.js

Backend & Databases: Node.js, Express.js, FastAPI, REST APIs, PostgreSQL, Supabase, Firebase

Tools & Other: Git, GitHub, GitHub Actions (CI/CD), OpenAI GPT API, Embedded C

EXPERIENCE

Software Engineer Nov 2023 – Present
Freelance *Remote – Leeds, UK*

- Build cross-platform mobile apps end to end in Flutter and Dart, owning the UI, business logic, backend and data layer.
- Develop REST APIs with FastAPI (Python).
- Design and manage databases for app backends using PostgreSQL and Supabase.

Flutter Developer Intern Jul 2023
Code Clause *Delhi, India*

- Developed Android applications in Flutter and Dart.
- Designed app screens and UI layouts with Flutter widgets, following Material Design guidelines.

Bare Metal Programmer May 2023
Nevee Technologies *Keelkattalai, Chennai*

- Programmed the KL25 (ARM Cortex-M0) microcontroller in Embedded C.
- Studied the KL25 microcontroller architecture and worked directly with its registers and peripherals, without an operating system.

Android Developer Intern Apr 2023
Oasis Infobyte *Delhi, India*

- Developed Android applications in Java.
- Learned core Android app development concepts, including activities, layouts and the app lifecycle.

PROJECTS

- **Nomad** – Cross-platform desktop focus timer (v1.0.0, open source, MIT). *Tauri v2, Rust, React, TypeScript, Zustand, Tailwind CSS, GitHub Actions* (GitHub)
  - Designed and shipped a work/break timer for Windows, macOS and Linux with native notifications and system tray integration.
  - Built a Rust backend handling tray menus, tooltip updates and Linux notifications via libnotify, with a typed command bridge to the React frontend.
  - Structured the frontend around a pure, side-effect-free state machine, a single Zustand store, and isolated hooks for timers, persistence and OS events.
  - Set up CI and a tag-triggered GitHub Actions pipeline that builds installers for four targets and publishes them as GitHub Releases.
- **Svik** – All-in-one social media platform with a Flutter client and a Node.js backend; in active development. *Flutter, Dart, Node.js* (Website)
- **AI Circuit Builder** – AI-powered tool that generates small to intermediate electronic circuits from text prompts. *PostgreSQL, Express.js, React, Node.js (PERN), OpenAI GPT* (Live App)
- **Note Warden** – Note-taking app that lets students organise notes into separate collections. *Flutter, Dart* (GitHub)
- **Deskpulse** – Customisable smart desk display that shows a personal mini dashboard (clock, local weather, stock prices or any data available through an API), configured from A to Z through a connected phone. (GitHub)
- **Love Calculator** – Simple Flutter app that calculates a love percentage between two names. *Flutter, Dart* (GitHub)

EDUCATION

B.E. in Electronics and Communication Engineering 2021 – 2025
St. Joseph's College of Engineering, Chennai CGPA: 7.0/10

Higher Secondary 2019 – 2021
Alpha Matriculation Higher Secondary School
